

A banner for the Space Nuclear Industry Symposium. It features a dark space background with a large, detailed moon in the upper right. A satellite with solar panels is visible in the lower left, orbiting a curved horizon of Earth. The text 'SPACE NUCLEAR INDUSTRY SYMPOSIUM' is centered in a large, white, sans-serif font.

SPACE NUCLEAR INDUSTRY SYMPOSIUM

WASHINGTON, D.C.  AUGUST 13, 2026

Space Nuclear Industry Symposium (SNIS)

Thursday, August 13, 2026

George Washington University, Washington, DC

Under the auspices of

The U.S. Nuclear Industry Council

Sponsorship Prospectus

OVERVIEW:

The Space Nuclear Industry Symposium (SNIS) is the premier forum for an inside look at what is happening across the space nuclear industry — and where the business opportunities are emerging in space nuclear power and propulsion. As the United States and its partners pursue long-duration missions, in-space mobility, lunar infrastructure, resilient national security capabilities, and commercial space development, nuclear technologies are becoming a critical enabler and a growing opportunity for companies across the advanced nuclear, aerospace, defense, energy, and investment communities.

As a sponsor or exhibitor, your organization will be positioned directly in front of the leaders shaping this market. SNIS brings together government officials, industry executives, researchers, investors, and mission stakeholders to discuss the partnerships, supply chains, policy frameworks, financing strategies, and deployment pathways needed to turn space nuclear innovation into real-world capability. This is your opportunity to build visibility, generate strategic connections, and demonstrate your organization's role in the future of space power and propulsion.
